Anemone x hybrida 'Queen Charlotte'

Plant Height: 18 inches

Flower Height: 3 feet

Spread: 18 inches

Sunlight:  

Hardiness Zone: 4a

Description:

Soft-pink semi-double buttercup flowers rise high above dark green foliage; windflowers are perfect for naturalizing, swaying gently in the wind and blooming at the end of the season

Ornamental Features

Queen Charlotte Anemone is smothered in stunning shell pink buttercup flowers with yellow eyes at the ends of the stems from late summer to late fall. The flowers are excellent for cutting. Its lobed leaves remain dark green in colour throughout the season.

Landscape Attributes

Queen Charlotte Anemone is a dense herbaceous perennial with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Queen Charlotte Anemone is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

Planting & Growing

Queen Charlotte Anemone will grow to be about 18 inches tall at maturity extending to 3 feet tall with the flowers, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!
